---

## SUMMARY

Backend Developer experienced in building backend systems using NestJS and Node.js, including real-time systems (Socket.IO) and data management with PostgreSQL, MongoDB, and Redis. Familiar with observability infrastructure (Grafana, Loki) and object storage (MinIO). Seeking a Backend Developer role.

## WORK EXPERIENCE

**Programmer (Backend Developer)** | PT. Semua Aplikasi Indonesia *Aug 2025 - Present*

- Built the backend of an IPTV hospitality management application from scratch using NestJS, PostgreSQL, and MongoDB.
- Implemented real-time communication using Socket.IO for hospitality system requirements.
- Contributed to a team developing a multi-tenant management system for ISP services.
- Used Redis for caching and session management, and MinIO for object storage.
- Performed system monitoring and observability using Grafana and Loki.

**Programmer Intern** | PT. Semua Aplikasi Indonesia *Feb 2025 - Jun 2025*

- Developed backend for survey and real-time nurse-call features on the Nonton+ Hospital application using Node.js and Socket.IO.

**Programmer Intern** | CV. Natusi *Jun 2024 - Aug 2024*

- Developed the medication and fluid administration menu for the IGD website of RSUD Dr. Wahidin Sudiro Husodo.

**Programmer Intern** | PT. Anekapay Teknologi Indonesia *Jul 2020 - Sep 2020*

- Built a web scraper for Shopee's API and displayed product names and prices using Golang.

## EDUCATION

**D3 Informatics Management** | Politeknik Negeri Malang *2025*

**Software Engineering** | SMK Telkom Malang *2022*

## SKILLS

- Backend: NestJS, Node.js, Golang (basic)
- Database: PostgreSQL, MongoDB, Redis
- Realtime: Socket.IO
- Tools & Infra: Docker, Git, Postman, MinIO, Grafana, Loki
- Languages: Indonesian (native), English (basic)
